Hugging Face Spaces for Speech Synthesis

Examples from the Hugging Face Category “Speech-Synthesis”, see <https://huggingface.co/spaces?category=speech-synthesis>

KaniTTS : Text to Speech Synthesis

<https://huggingface.co/spaces/nineninesix/KaniTTS>

OpenAI Text-To-Speech : Text to Speech Synthesis with Emotion Control

<https://huggingface.co/spaces/NihalGazi/Text-To-Speech-Unlimited>

NeuTTS-Air : Voice Cloning and Text to Speech Synthesis

<https://huggingface.co/spaces/neuphonic/neutts-air>

Hugging Face Spaces for Music Generation

Examples from the Hugging Face Category “Music-Generation”, see <https://huggingface.co/spaces?category=music-generation>

SongGeneration: Text or Audio Prompt for Music Generation

<https://huggingface.co/spaces/tencent/SongGeneration>

Image to Music V2 : Image Prompt for Music Generation

<https://huggingface.co/spaces/fffiloni/image-to-music-v2>

ACE-Step : Music and Singing Audio from Textual prompts, Tags, and Lyrics

<https://huggingface.co/spaces/ACE-Step/ACE-Step>

Hugging Face Pipeline API

https://huggingface.co/docs/transformers/en/main_classes/pipelines

Pipelines

The pipeline abstraction

Pipeline batching

Pipeline chunk batching

Pipeline FP16 inference

Pipeline custom code

Implementing a pipeline

Audio

AudioClassificationPipeline

AutomaticSpeechRecognition
Pipeline

TextToAudioPipeline

ZeroShotAudioClassification
Pipeline

```
import torch
from diffusers import AudioLDM2Pipeline

pipe = AudioLDM2Pipeline.from_pretrained("cvssp/audioldm2",
torch_dtype=torch.float32)
pipe = pipe.to(device)

generator = torch.Generator(device).manual_seed(0)

# run the generation
audios = pipe(
    "A Voice that sounds like Creaking Wood",
    negative_prompt="Low quality",
    num_inference_steps=20,
    audio_length_in_s=5.0,
    num_waveforms_per_prompt=1,
    generator=generator,
).audios
```
