

# AI for Sound

## CAS AI for Creative Practices

# Day 2 - Generating Sound with AI Part 1

|               |                                                             |         |
|---------------|-------------------------------------------------------------|---------|
| 13:00 - 13:15 | Check-in                                                    |         |
| 13:15 - 14:00 | Artistic and Musical Applications of Neural Sound Synthesis | Giacomo |
| 14:00 - 14:45 | Introduction to RAVE                                        | Giacomo |
| 14:45 - 15:15 | Break                                                       |         |
| 15:15 - 16:45 | Stacco: a Digital Instrument for Performing with RAVE       | Giacomo |
| 16:45 - 17:00 | Check-out                                                   |         |

# Day 3 - Generating Sound with AI Part 2

|               |                                               |        |
|---------------|-----------------------------------------------|--------|
| 13:00 - 13:15 | Check-in                                      |        |
| 13:15 - 14:00 | Audio Clustering and Nearest Neighbour Search | Daniel |
| 14:00 - 14:45 | Tutorial                                      | Daniel |
| 14:45 - 15:15 | Break                                         |        |
| 15:15 - 16:00 | Audio Autoencoder and Latent Navigation       | Daniel |
| 16:00 - 16:45 | Tutorial                                      | Daniel |
| 16:45 - 17:00 | Check-out                                     |        |

# Day 4 - Generating Sound with AI Part 3

|               |                                            |         |
|---------------|--------------------------------------------|---------|
| 13:00 - 13:15 | Check-in                                   |         |
| 13:15 - 14:00 | Generative Audio Looping with WaveBeat     | Olivier |
| 14:00 - 14:45 | Tutorial                                   | Olivier |
| 14:45 - 15:15 | Break                                      |         |
| 15:15 - 16:00 | Hacking Text to Speech Synthesis with Bark | Olivier |
| 16:00 - 16:45 | Tutorial                                   | Olivier |
| 16:45 - 17:00 | Check-out                                  |         |

# Day 5 - Generating Sound with AI Part 4

|               |                                                                              |        |
|---------------|------------------------------------------------------------------------------|--------|
| 13:00 - 13:15 | Check-in                                                                     |        |
| 13:15 - 14:00 | Introduction to Huggingface                                                  | Daniel |
| 14:00 - 14:45 | Experimenting with Text to Audio Pipelines (AudioLDM2 and Stable Audio Open) | Daniel |
| 14:45 - 15:15 | Break                                                                        |        |
| 15:15 - 16:00 | Experimenting with Audio Editing (Stable Audio 3)                            | Daniel |
| 16:00 - 16:30 | Project Work, Finding Dates for Presentations                                |        |
| 16:30 - 16:45 | Planning the final project                                                   |        |
| 16:45 - 17:00 | Check-out                                                                    |        |
| 17:00 - 19:00 | Apero                                                                        |        |
